

*Increasing Crime, Limited Budgets,
Multiple Sites & Less Supervision...*

Until Now

*Introducing the
Community POD Alliance*

*Surveillance Cameras are proving to be a
valuable tool for Businesses, Local
Government and Law Enforcement.*

*Unfortunately, the fact is that most cities and
towns are facing budget challenges. With the
infrastructure for multiple camera systems
costing hundreds of thousands of dollars and
the technology always changing, investing in
surveillance systems is unrealistic for most
police and government departments.*

*However, with the **i4-POD**, business and
residential neighborhoods can create a
partnership with their local police department.*

*The **i4-POD** can be purchased by local
businesses and homeowner associations to
help deter unwanted activities at their place of
business and in their neighborhoods. By
allowing their local police department access
to view their cameras, businesses and
homeowner associations will be giving their
local law enforcement the extra eyes the police
need to better serve their community.*

*Call us today to find out more about
how **SECURITY LINES** can help you get
the **Community POD Alliance** started in
your city.*

NEED CAMERAS

Somewhere

But Can't Afford

**The High Cost
Of Infrastructure??**

SECURITY LINES US

The i4-POD Is Your Versatile & Affordable Solution

With the new **i4-POD**, we have designed a complete portable surveillance system with a digital video recorder, wireless broadband router and cameras in one easily mounted enclosure.

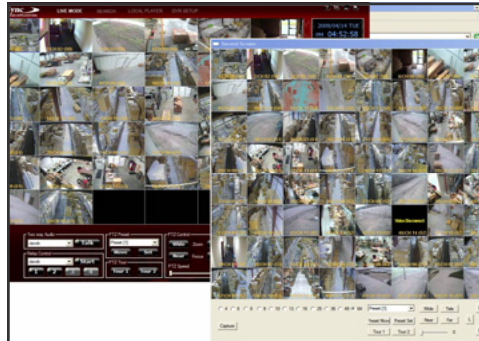

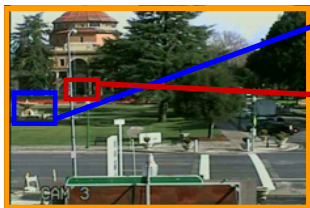

During this tough economy, many cities are facing unwanted activities in numerous areas with time and money being huge factors in how to best address these issues. The **i4-POD's** presence in an area can help deter the unwanted activities. It's versatility and affordability allows you to place the **i4-POD** in many areas quickly at a fraction of the cost.

Get More, Do More, Save More

- ◆ With 4 cameras, instead of the traditional 1 IP camera, at a location, you can get a 240° view of an area. 3 Pan-Tilt-Zoom cameras allow you to change your views remotely and focus on more than just one area.
- ◆ Plug-n-Play portability gives you the flexibility to use an **i4-POD** at one location that has unwanted activity, then easily move it to the next when it is no longer needed at that one location.
- ◆ Compact, self contained system only needing 110 power makes the **i4-POD** easy to install at multiple locations without ever having to worry about the high cost of infrastructure. You can have 6 **i4-PODs**, giving you 24 cameras, up and viewable from your desk in a day.
- ◆ Central Monitoring Software, Web Browser Viewing and i-Phone App come standard with the **i4-POD** systems. No per computer or per camera licensing fees.

Have 4 Cameras to get a complete view of the area. 27x Zoom PTZ cameras allow you to view areas up close.

View up to 64 cameras from different jobsites on one screen, with up to 4 screens total for 256 cameras.

POD Features

- **Easy to Move & Install** - Portable System with Custom Mounting Brackets for easy installs and removals.
- **Multiple Cameras** - 4 cameras in a single weatherproof enclosure give an instant, complete view of the area.
- **Live Instant Video** - View remotely from any computer, laptop or i-Phone with internet access using central monitoring software, web browser or i-Phone App.
- **Record Activity 24/7** - Record up to 45 days of video. Playback video remotely from a specific date, time and camera.
- **User-Friendly Central Monitoring Software** - View up to 64 Cameras on one screen, search, playback./download remotely and view up to 256 cameras at once - (4 screens with 64 cameras each).
- **Easy Video Conversion to Windows Media Player File**
